1. Students make some editing the activity triangle to describe their own research contexts / projects.

2. Challenge them to reflect on their theoretical choices and assumptions about their ideas.

3. Purpose: Students are encouraged to write more research-based ideas about technology in education.

4. Model creation:
   - Facilitate guided discussion and reflection on their ideas about technology in education.
   - Using the iPad, students share and discuss their ideas.
   - Invite feedback from the teacher and peers.

Conclusions:
- You can find the right app
- Easier sharing, passing, organizing, responding
- The iPad supports multiple approaches to modeling

This activity was designed, implemented, and evaluated in collaboration with Aron Salik at the IU FLC.
